

SRIXON ZX5 AND ZX7 IRONS: ZX, MK II AND ZXI

Srixon's ZX5 and ZX7 came out in 2021, the Mk II versions in 2023 and the ZXi5 and ZXi7 in 2025. Across all three generations the lofts and lies stayed the same. Here's what that means if you're missing one iron.

Specs from our iron catalogue, checked between September 29 and October 6, 2026. Each set's page names its source.

THE SHORT ANSWER

The ZX5 Mk II has the same published loft, lie and length as the ZX5 on every club (a 31° 7-iron); the Mk II adds an AW. **The ZX7 Mk II matches the ZX7 the same way** (a 32° 7-iron). So a single iron from either generation fills a gap in the other.

The ZX5 and ZX7 share their 3- and 4-irons: 20° and 22°, with the same lie and length. From the 5-iron down the ZX7 is 1° to 2° weaker, so the two lines don't mix below the 4-iron.

The 2025 ZXi5 and ZXi7 keep the Mk II lofts and lies on every club. Srixon now publishes iron lengths about a quarter inch longer, but that's a change in how it measures, not in the clubs (Srixon's own spec sheet says so), so on paper every ZXi length reads 0.25 inch longer. For a missing iron, ZX, Mk II and ZXi of the same line fit at the same lofts and lies; only the head design differs.

Srixon's second-generation ZXi7 and ZXi5 reach US stores on Oct 16, 2026 with the same stock lofts again (GOLF.com); the ZXi5's published lies match the 2025 set and its PW is listed 0.25 inch longer. They have their own pages: the [2026 ZXi7](#) and [2026 ZXi5](#), plus the new [ZXi5+](#), which replaces the ZXi4.

WHICH IRONS FIT YOUR SET

"Identical" sets match yours on every club both make, so a single iron from one fills a gap in the other. "Same lofts" sets will fill the gap at the right loft, but check the lie or length difference with a fitter first. Either way, the head looks different from the rest of your bag.

TELL THE GENERATIONS APART

The Mk IIs look almost identical to the originals, so check for "Mk II" on the listing or the club. Within each line it doesn't change the specs, but the head design differs. Srixon's AW is the wedge after the PW: 50° on the ZX5 Mk II, 51° on both ZX7s.

The ZX5 and ZX7 figures come from retailer spec tables; the Mk II figures from Srixon's own tables as published by Dunlop and its retailers. Each set's page names its source.

WHAT WE HAVEN'T CATALOGUED

The original ZX4 (2021) isn't catalogued yet. The other Srixon irons have their own pages: the [ZX4 Mk II](#), the [ZXi4](#), the [ZXiR](#) and the [ZXiU](#) utility irons ([2025](#) and [2026](#)).
